**INTELLIGENT
ENERGY
EUROPE**

FOR A SUSTAINABLE FUTURE

After receiving the request from the principal of Kindergarten Tatjane Marinić in Croatia to organize a workshop for children regarding energy sources and new energy labels, it took place in the kindergarten on May 17th 2012.

Explaining the new energy label, its design and content

Distributed the blank energy labels without the energy classes – for children to rank from the most efficient to the least efficient

Preparing the energy classes for kids to stick on the blank labels

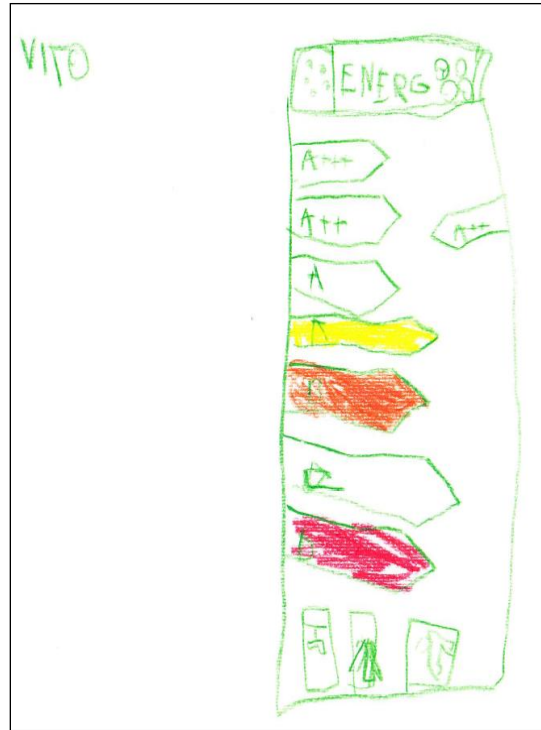

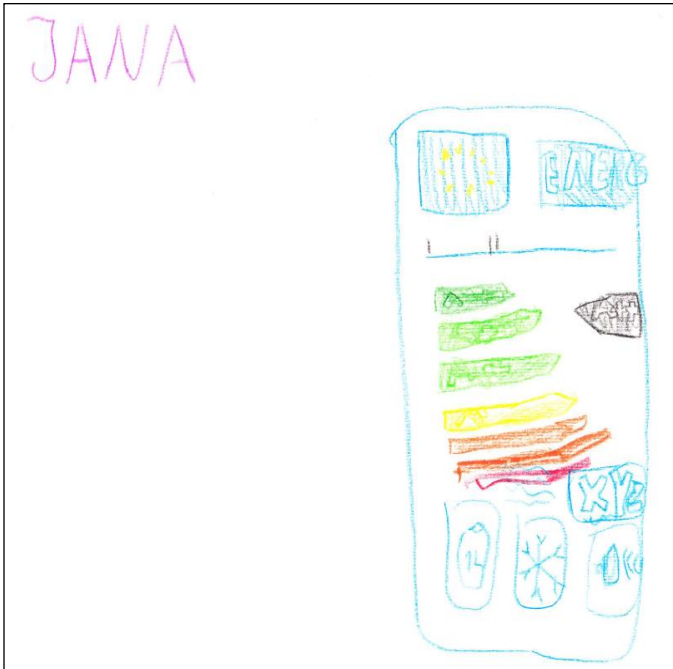

All kids are sticking the energy classes actively!

Some of them finished earlier!

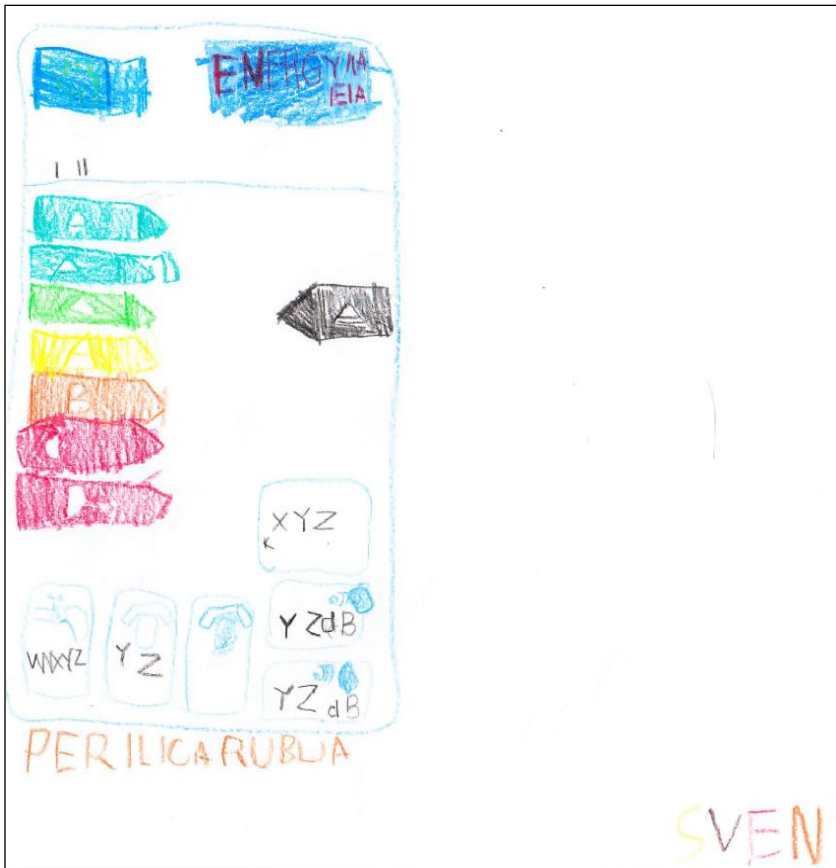

After finishing the action!

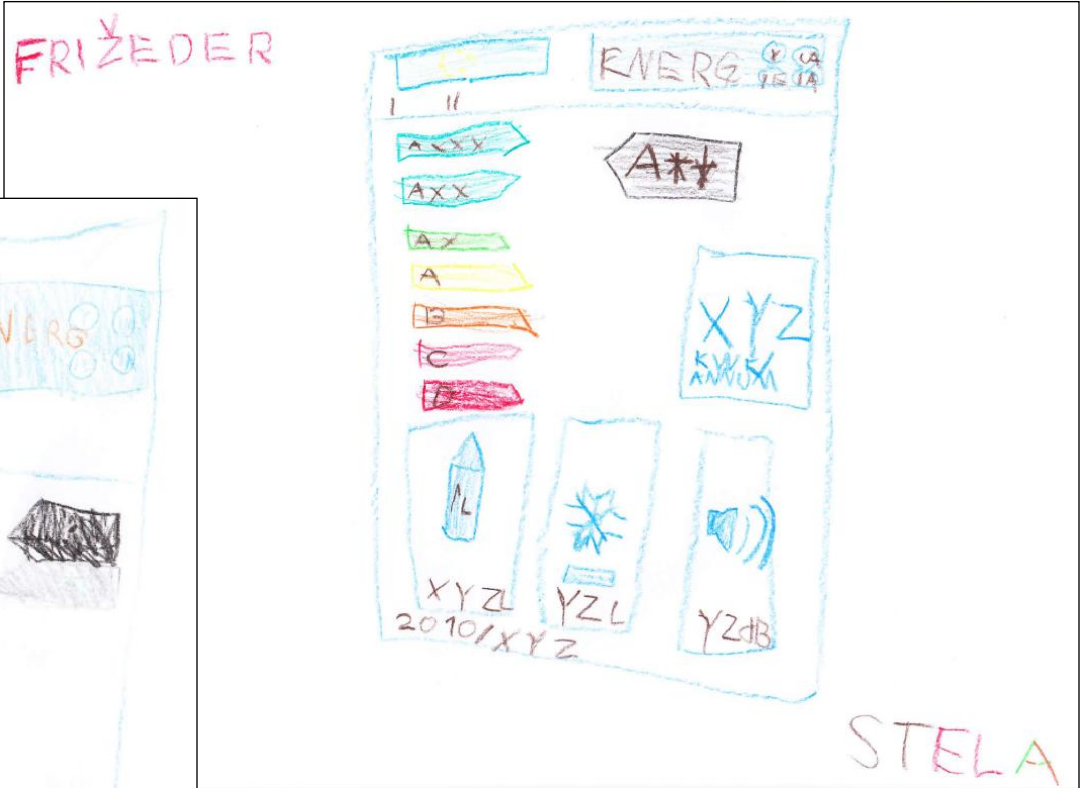

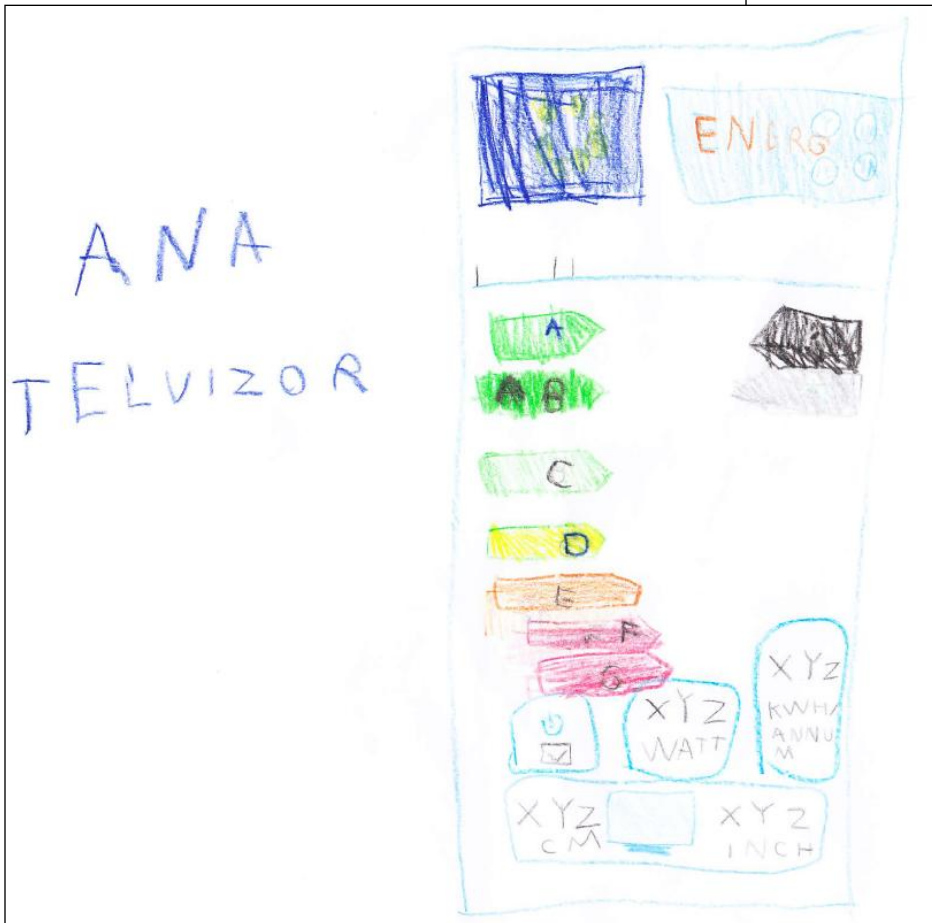

At the end we asked them to draw and paint one energy label. Here are some examples
